

F-2012-00020 – IVF cycles using fresh eggs during 2010 and 2011

16 February 2012

Summary of request

The Authority was asked for the number of IVF treatment cycles during the first and second half of 2010 that used fresh eggs (patient or donor).

HFEA response

To calculate this we have looked at all fresh only licenced treatments where one or more eggs were collected. Any cycles in which eggs were thawed have been excluded.

This information was extracted from the HFEA's data warehouse containing Register data on 16/02/2012. Please note that the information in our database may be subject to change as licensed centres notify us of information that updates or corrects information they have previously supplied. Cycle data up to 31 December 2010 have been subject to a verification process, and the centres that supplied the data have been asked to confirm their accuracy, for which they remain responsible.

Time period	Number of cycles
2010/01/01 to 2010/06/30	20332
2010/07/01 to 2010/12/31	22370
