

F-2015-00325- egg freezing and reasons by year

21st November 2015

Summary of request

The HFEA was asked for information on the number of women in the United Kingdom who have opted to undertake egg freezing between the dates 2010-2011, 2011-2012, 2012-2013 and 2014-2015.

HFEA response

Please note that the HFEA can only provide data up to 30/06/2014 as this is the latest date for which we have verified treatment information.

You have also requested what proportion of the number of women have stored their eggs due to medical or social reasons. I cannot provide this information as the HFEA does not collect this information.
